ANNUAL REPORT

OF

THE TRUSTEES

OF THE

MEDFIELD STATE HOSPITAL

FOR THE

YEAR ENDING NOVEMBER 30, 1929

---

DEPARTMENT OF MENTAL DISEASES

SEP 17 1931

MEDFIELD STATE HOSPITAL  
OFFICERS OF THE HOSPITAL  
TRUSTEES

WALTER RAPP, *Chairman*, Brockton.  
EUGENE CARMAN, *Somerville*.  
CHRISTIAN LANTZ, *Secretary*, Salem.  
LOUISE WILLIAMS, *Taunton*.  
GEORGE O. CLARK, M.D., *Boston*.  
DANFORTH COMINS, *Concord*.  
CAROLYN BEALS ODELL, *Cambridge*.

RESIDENT OFFICERS

ELISHA H. COHOON, M.D., *Superintendent*.  
SAMUEL SMITH COTTRELL, M.D., *Assistant Superintendent*.  
G. ALLEN TROXELL, M.D., *Senior Physician*.  
GEORGE E. POOR, M.D., *Senior Physician*.  
CLIFFORD D. MOORE, M.D., *Senior Physician*.  
\_\_\_\_\_, *Senior Physician*.  
VICENTE NAVARRO, M.D., *Assistant Physician*.  
GRACE T. CRAGG, M.D., *Assistant Physician*.  
BERNARD S. ROBBINS, M.D., *Assistant Physician*.  
FOSTER LANE VIBBER, M.D., *Assistant Physician*.  
ELTON V. FAASS, D.M.D., *Dentist*.  
LOUIS A. HALL, *Steward*.  
JOSEPHINE M. BAKER, *Treasurer*.

HEADS OF DEPARTMENTS

MYRON D. PLACE, *Chief Engineer*.  
ARTHUR F. SMITH, *Maintenance Foreman Mechanic*.  
RODMAN NOWERS, *Head Farmer*.  
FLORENCE M. WOOLDRIDGE, R.N., *Principal of School of Nursing*.  
CHARLES W. BROWNING, *Chief Supervisor, Male Side*.  
HATTIE I. TROXELL, R.N., *Head Housekeeper*.  
MARJORIE E. WEBSTER, *Dietitian*.  
ELIZABETH ARTHUR, *Head Occupational Therapist*.

CONSULTING STAFF.

GEORGE O. CLARK, M.D., *Surgeon*.  
ALBERT EVANS, M.D., *Physician*.  
HAROLD TOBEY, M.D., *Laryngologist*.  
FRED KINGSLEY, M.D., *Ophthalmologist*.  
JOHN ADAMS, M.D., *Orthopedist*.

TRUSTEES' REPORT

*To His Excellency the Governor, and the Honorable Council:*

E. H. Cohoon, M. D., Superintendent of the Medfield State Hospital has made his report, for the fiscal year ending November 30, 1929, to the Trustees of the institution. The report has been accepted as a convincing and business like document. It is transmitted herewith for your consideration.

Every important phase of operation is included in this report. Besides, there will be found recommendations for maintenance and additions to the physical properties of the hospital. All of these requests coincide with the judgment and interest of the Trustees.

The Trustees do not overlook the seriousness of the great expenditure in care of the wards of the State. With full knowledge of the operation of every branch of this hospital and with some information of similar work in public and private institutions, the Trustees endorse the present standards of business and professional ideals. In the treatment of mental disease the best care is believed to be cheapest for the State.

The percentage of attendance of Trustees at their meetings has fallen below the average, but the Trustees are united and organized to meet statute requirements.

The executive and professional staff of the hospital, led by Doctor E. H. Cohoon, is capable, dignified and attractive. The hospital is successful.

11482  
1929  
Respectfully submitted,

EUGENE M. CARMAN

CHRISTIAN LANTZ, *Secretary*

LOUISE WILLIAMS

GEORGE O. CLARK, M.D.,

DANFORTH COMINS

CAROLYN BEALS ODELL

WALTER RAPP, *Chairman*.

## SUPERINTENDENT'S REPORT

*To the Trustees of the Medfield State Hospital:*

I have the honor to present to you the thirty-fourth annual report of the operation of this hospital for the year ending November 30, 1929.

The Medical Statistical Tables and the statistics as shown in the "Movement of Population," cover the year ending September 30, 1929.

### MOVEMENT OF POPULATION

At the beginning of the year there were on the books of the hospital a total of 1,854, — 765 men and 1,089 women. There were 24 males and 30 females on visit and escape and 10 women in family care. There were actually resident in the hospital 759 men, 1,069 women, a total of 1,828. There were received into the hospital a total of 230, — 161 by direct commitment and 69 transfers from other hospitals. Of this total 121 were males and 109 females. The total number under treatment was 2,084 and the daily average number of patients in the hospital was 1,821. The daily average number of patients in family care was 8. The total discharge during the year was 174, — there being 91 men and 83 women. Of these discharges 88 were by death. Of the remaining, 22 were discharged as recovered, 31 as improved, 10 as unimproved, 8 as not insane and 15 by transfer. At the end of the year there were 74 on visit and escape and 8 women in family care. Remaining on the books September 30, 1929, there was a total of 1,910 and there were actually in the hospital 1,828.

### MEDICAL WORK

On the whole the health of the hospital has been good during the year. There were no epidemics.

The medical work was maintained at its usual standard and, if anything, improved.

There was not more than one vacancy on the medical staff at any one time and for a period of two months the staff was filled.

The Medfield State Hospital Round Table Club met once a month during the fall, winter and spring. Members of the staff took turns presenting papers dealing with the care of certain groups of patients.

Work on two research problems was carried on over a period of several months. (1) Research regarding metabolism in cases of catatonic dementia praecox and encephalitis lethargica; (2) Research regarding the effect of electro-therapeutics applied in post encephalitis lethargica and also in cases of dementia praecox, catatonic form. This work has not been prosecuted for a sufficient length of time to correlate the report and arrive at conclusions.

The use of physiotherapy has proven to be a very valuable adjunct to our medical treatment. An average of about 30 patients are treated each day. It has been found that the various forms of this treatment not only tend to correct many physical conditions, but in certain special cases undoubtedly result in improving the mental states. Especially is this noticeable in the depressions. The patient having received appropriate hydropathic treatment, preferably the salt bath, is at once taken to the physiotherapy treatment room and treated with ultra-violet ray. This combined treatment, in a number of cases, seemed not only to make the patient feel much better but also appeared to improve his physical state. Although this special treatment has not continued a sufficient time to warrant us drawing definite conclusions it is the impression of the physicians that it tends to cut short the period of depression especially in the involution cases.

Unfortunately we have been without the services of a pathologist for part of the year. Routine work, however, is carried on by a competent technician under the direction of the assistant physicians. A complete laboratory examination as a part of the regular physical examination is made in the case of every patient admitted. Laboratory examinations are used in all cases where special symptoms arise.

During the year the following operations were performed: Hysterectomies, 3; appendectomies, 2; cholecystectomy, 1; operation for the relief of pelvic abscess, 1; operation for the relief of rectal abscess, 1; operation for the relief of abscess of neck, 1; operation for relief of abscess of scalp, 1; amputation of finger, 1; tonsillectomies, 5. All made excellent recoveries except one who died shortly after operation.

In addition two of our patients were operated on at the Pondville Hospital: (1) Amputation of left breast; (2) Removal of epithelioma from left fifth finger.

#### STAFF CHANGES

Thomas F. McCarthy, M. D., resigned as assistant physician February 28, 1929.

Howard M. Jamieson, M. D., resigned as senior physician, pathologist, April 24, 1929.

Bernard Robbins, M. D., was appointed assistant physician, July 16, 1929.

Foster L. Vibber, M. D., was appointed assistant physician, September 2, 1929.

Clifford D. Moore, M. D., was promoted from assistant physician to senior physician October 5, 1929.

William T. Cluney, M. D., was appointed senior physician, pathologist, October 18, 1929.

#### DENTAL WORK

The dental work has been carried on in the usual successful way. The routine of charting the dental needs of each incoming patient has continued. The dentist who has again remained with us has maintained his usual high standard of efficiency.

The following is a report of the work done during the year: Patients' visits, 2,758; examinations, 327; cleanings, 1,448; scalings, 242; cement and amalgam fillings, 135; amalgam fillings, 27; cement fillings, 64; copper cement fillings, 86; synthetic porcelain fillings, 161; temporary fillings, 28; pulp canal fillings, 14; pulp canal treatment, 82; treatments (stomatitis, etc.), 329; extractions, 385; novacaine anaesthesia, 238; ether anaesthesia, 4; full plates, 7; partial plates, 1; plates repaired, 9; bridges, 2; bridges recemented, 3; crowns recemented, 1; X-rays, dental, 198.

#### TRAINING SCHOOL FOR NURSES AND EMPLOYEE PROBLEM

Only two nurses were graduated the past year. There are at present but 12 nurses in training.

We have not introduced the new course of mental nursing that has been under consideration for some time. There is a possibility that this course will be opened up this coming fall.

In general there has been an improvement in the standard of the personnel. There have been more applications for positions. It would also seem that this particular type of hospital work is becoming more attractive, especially for the higher positions.

Improved housing conditions and facilities and increased salaries have each aided in securing an improved and higher type of employee for all positions.

#### FARM, GARDEN AND GROUNDS

The past year we were finally able to complete the road around the central group of buildings. In this location a new balasted tarvia road was constructed. This has aided very much in preventing dust and dirt from being carried into the kitchen, bake shop and cold storage.

It is planned this coming year to construct tarvia roads behind the ward buildings.

There was the usual work on the lawns and grounds.

Operations on the farm were attended with average success. The dry weather was not very favorable for the production of large crops, but our garden as usual turned in a good profit. On the whole, the results were better than anticipated.

Covering a period of years the farm at the Medfield State Hospital has rather steadily increased in productiveness. No small part of this was due to the head farmer, Mr. Leon E. Mayo, who, after serving for 26 years as head farmer, retired in May and accepted an excellent position with the Walker Gordon Company. Mr. Mayor was one of the very first employees of the hospital, occupying the position of supervisor when the hospital was opened in 1896. He held this position until 1903 when he took the position of head farmer. In addition to his career in that position he was looked upon and generally regarded as the highest type of State employee. He was not only devoted to the interests of the State, but set

an example from the standpoint of high ideals and loyalty. Mr. Mayo's retirement is a distinct loss to this hospital and the State of Massachusetts.

His position has been filled by Mr. Rodman Nowers who had served two years previously under Mr. Mayo and who is a graduate of the Amherst Agricultural College course.

#### REPAIRS, ORDINARY

Out of funds for repairs ordinary the two smaller patients' dining rooms in the G-building were painted and decorated. In order to complete these two dining rooms about 25 round tables and 250 chairs were manufactured out of home grown and home sawn oak.

The usual painting and repair work was carried on generally throughout the institution. In addition B-3 and C-3 were more or less renovated and painted.

#### REPAIRS AND RENEWALS

Out of funds appropriated in 1928 a modern bull barn was erected during the year 1929. It provides for accommodations for four bulls and is so arranged each bull has a separate yard. The equipment is modern.

The sum of \$1,800 was appropriated for the purpose of equipping the piggery. Standard Lowden pen equipment and track were installed.

The sum of \$1,170 was expended in repair of the gutters and conductors on the various ward buildings.

A feed track was installed in the barn.

Materials were purchased for the installation of a ventilating system in the calf barn.

Materials were also purchased for the reconstruction of the Employees' Club Room.

The work on these two latter projects are to be carried on during the winter of 1930.

Additional heating units were installed in Wards C-2, C-3, and C-4.

The following projects under "Repairs and Renewals" are recommended for 1930:

1. Machinery and appliances . . . . .	\$4,454.00
These machines and appliances consist of milling machine, turning lathe, electric bread slicer, electric cake mixer, doughnut kettle, galvanized iron proof boxes, electric griddle and electric toaster.	
2. Installation of sprinklers, . . . . .	2,060.00
To be installed in the basements of G-1, H, S-1 and S-2.	
3. Changes in the heating system . . . . .	2,025.00
This is for the purpose of further utilization of exhaust steam and will result in the efficiency of the power plant.	
4. Bath tubs . . . . .	150.00
To be installed in the employees quarters G-2.	
5. Repair of gutters . . . . .	985.00
6. Reshingling calf barn . . . . .	326.00
Total . . . . .	<u>\$10,000.00</u>

#### SPECIAL APPROPRIATIONS

In 1929 there was appropriated the sum of \$40,000 for an additional water supply. The site of this supply was located and test wells driven from an appropriation of \$8,000 made the year before. An option was acquired on 17 acres of land owned by Mrs. Sybil Hutson. It is expected that active work will begin early in the spring of 1930 when the property will have been purchased and contracts let for installing the electric equipment and laying the pipe.

#### REQUESTS FOR SPECIAL APPROPRIATIONS FOR 1930

I again submitted to the Department of Mental Diseases requests for that part of the five year program which had not already been granted.

The following items were requested:

1. Reconstruction of present or erection of a new administration building . . . . .	\$75,000.00
2. Erection of three cottages for officers . . . . .	18,000.00
3. Additional generating unit . . . . .	10,000.00
4. Installation of new boilers . . . . .	40,000.00

5. Renovation of baths and toilets . . . . .	50,000.00
6. Rewiring and lighting 28 buildings . . . . .	50,900.00
7. Erection of a shop building . . . . .	50,000.00
8. Reconstruction of present industrial building . . . . .	10,000.00
9. Completion of piggery . . . . .	3,000.00
10. Erection of a henery . . . . .	2,000.00
11. Erection of a horse stable . . . . .	12,300.00
12. Erection of implement and grain shed . . . . .	8,500.00

Total . . . . .	\$332,700.00
-----------------	--------------

I was asked by the Department of Mental Diseases to resubmit certain of these items that we considered most pressing and so I presented the following:

Erection of three cottages . . . . .	\$18,000.00
Renovation of baths and toilets . . . . .	10,000.00
Reconstruction of present or erection of a new Administration building . . . . .	75,000.00
Additional generating unit . . . . .	10,000.00

We are very much in need of cottages for officers. There should be a cottage for the assistant superintendent, the steward, and one senior physician.

Last year we were not given an appropriation for the installation of baths and toilets. With what money has been granted suitable and adequate bathing facilities have been provided for wards F-1 and F-2. Needs of the other buildings are indeed very pressing.

Either the reconstruction or erection of a new administration building is very much required. The present administration building is not suitably arranged and is not large enough for the increasing office work. A new administration building would meet these requirements and would provide the old administration building for housing purposes. At the present time we have not sufficient rooms for the employees.

The additional generating unit is a matter of safeguarding our power plant. The increasing demand for power and light are such that our present equipment is insufficient.

#### FINANCIAL

The sum appropriated for 1929 was \$669,580. There was carried forward to cover bills contracted in 1928, — \$17,315.48 and an additional appropriation of \$3,000, making the whole total, \$689,895.48. The \$3,000 was to cover laundry work done for the Pondville Hospital.

There was a total expenditure of \$665,322.25, leaving a balance of \$24,573.23. This balance was largely accounted for by a sum accruing under Heat, Light and Power of \$12,933.67, and a sum under Personal Services of \$7,349.64, — making a total of \$20,283.31. The unexpended balance under Heat, Light and Power cannot be controlled by the hospital and depends on the amount of coal the Purchasing Agent sends to the hospital.

For the first time for a number of years more than a sufficient sum of money was allocated to Personal Services.

The weekly per capita cost was \$7.01.

#### RELIGIOUS INSTRUCTION

There has been no change in the order of conducting religious services.

Mass was celebrated on Sunday mornings and holy days; Protestant services were held Sunday afternoons and Jewish services on Wednesday.

#### AMUSEMENTS AND ENTERTAINMENTS

There was the usual number of entertainments. On Monday evenings there were moving pictures and on Thursday evenings dances.

Plays were given by various organizations and the hospital orchestra performed up to its usual standard.

#### OCCUPATIONAL AND INDUSTRIAL WORK

The program for occupational work was maintained throughout the year and every possible patient, male and female, whose physical and mental condition would permit was occupied in some way.

Considerable attention was given to the employment of special groups of patients with very satisfactory results.

## ACKNOWLEDGEMENTS

We are again indebted to Dr. George O. Clark for his advice and surgical work. The public has not lessened in its interest toward the welfare of the hospital as a whole and the individual patient.

Various organizations sent reading matter and brought plays and entertainments for the benefit of the patients.

As usual, the Legion Post and Auxilliary of Medfield, Millis, and Dover presented gifts and gave entertainments.

Mrs. Almy of Cambridge, Miss Atwood of Worcester, Mrs. Webb and Mrs. Pierce of Medfield, Medfield Library, Mr. Tibbets and a number of others are in our debt for contributions of various kinds.

Mr. Leroy Kiff of Attleboro again presented an excellent play.

I am especially grateful to all those who have in this way shown their interest in the patients of this hospital.

## GENERAL AND SPECIAL OBSERVATIONS

The past year differed very little from other years in regard to improvements for the comfort and treatment of patients.

Special attention was given during the year toward the care of the very untidy and to a group inclined to be destructive and noisy.

Ward F-1, which houses part of our disturbed and destructive class of patients, was prepared especially to carry out my idea relative to the proper care of this special type of patient. A new toilet, lavatory and bath section was added, the day room was repainted and decorated, rugs placed on the floor, pictures on the walls, the settees were cushioned and easy chairs and rockers added. Plants and reading matter was furnished. In addition, a program was made out that arranged for conduct improvement, such as care of the hair, clothes and the introduction of occupational therapy. In other words, this type of patient was changed from a back ward atmosphere to a front ward or parlor ward atmosphere. The results have been very satisfactory. The amount of destruction has greatly lessened. The appearance, the habits and conduct of the patient much improved and their happiness increased.

The success of this experiment has been such that I now plan to extend this program to other wards on which there are disturbed and destructive patients.

The superintendent and assistant superintendent have given lectures and courses in mental hygiene as the demands in the community required.

A mental hygiene clinic known as the Quincy Child Guidance Clinic was opened up in the city of Quincy. This is run in cooperation with the Health Officer of Quincy, the Superintendent of Schools and various organizations in that city. The personnel of the clinic consists of the assistant superintendent, social worker and psychologist. The clinic is held every Thursday. From the start it has been a success. The only difficulty is to meet the demands of this clinic.

The morale of the personnel has been excellent. I have the consciousness that there is a feeling of loyalty and devotion on the part of all officers and employees and I wish to acknowledge my appreciation of this.

Your interest in the work is most heartening and the fact that I feel I can always go to you in times of stress and trouble is most comforting.

Respectfully submitted,

ELISHA H. COHOON, *Superintendent*

## REPORT OF THE SOCIAL SERVICE DEPARTMENT

*To the Superintendent:*

I beg to submit the annual report of the Social Service Department of the Medfield State Hospital from October 1, 1928 to October 1, 1929 as follows:

*Numerical summary of cases in care of Social Service Department:* Hospital cases—New, 97; renewed, 12; boarding out, 10; trial visit, 70. Community cases (school clinic), 222.

*Sources of cases:* Hospital — Referred by physicians: new, 97; renewed, 12. Automatically referred by: boarding out, 10; trial visit, 70. Community — School cases referred by the school authorities of: Woburn, Stoneham, Wakefield, Medford, Melrose and Bedford, 222.

*Analysis:* Purposes for which cases were referred — For contributions to medical-social history, 112. For investigation of — Conduct disorders, 9; em-

ployment, 22; home conditions, 77; statements of patients, 22; statements of others, 28; connecting with agencies, 32. Personal services (principally removal of personal property), 13. For permission for autopsy or lumbar puncture, 2. Location of relatives, 13.

*Problems:* Disease — Mental, 189; physical, 11. Sex problems (including marital), 19. Environment, 37. Personality problems, 20. Legal problems, 17.

*Services rendered:* Contribution of information re: medical history, 112. Contribution of information re: home conditions, 90. Condition of boarding out patients, 16. Adjustments for patients, 103.

*Supervision:* Patients on trial visit, 70; discharged during year, 16; returned from trial visit, 14; visits, 73. Patients on boarding out list, 10; returned from boarding out, 3; visits, 28; patients placed, 6; boarding out homes investigated, 13.

*Miscellaneous:* Amount of expense account — School, \$36.27; hospital work, \$224.62. Distribution of time — Number of days in hospital, 177½; number of days outside, 257; days spent in school work, 27.

*Special features:* Staff meetings attended, 57; conferences, 14; lectures given, 11; visits to other institutions, 12.

*Personnel of Department:* Psychiatric Social Worker, Nina Eldridge, December 10, 1928 — October 1, 1929. Assistant Social Worker, Alice Boynton, April 18, 1929 — October 1, 1929. Student Worker, Lillian Levin, July 8, 1929 — October 1, 1929.

*Comment:* From October 27, 1928 to December 10, 1928, the Department was vacant, so that this report covers 10½ months of work for the year.

The work of the Department was carried on by Miss Ruth Yeomans and by the present worker for the remainder of the active year from December 10, 1928 to October 1, 1929.

Miss Alice Boynton, Wheaton '28, came in April and Miss Lillian Levin also of Wheaton, '29, in July. Both these workers have been valuable additions to the staff.

The Department has striven to render any assistance in its power to the Medical staff and the Hospital administration and wishes to express its appreciation for the uniform courtesies and consideration with which it has been treated and the unfailing encouragement accorded it.

Respectfully submitted,  
NINA ELDRIDGE.
